

Product Information

Mouse Lipopolysaccharides (LPS), Monoclonal Antibody

CAT#: ANT04

Lipopolysaccharide is a kind of endotoxin when it acts on other biological cells such as humans or animals, it will show a variety of biological activities. The physiological role of lipopolysaccharide is reflected by Toll-like receptor 4 (TLR4) present on the cell membrane surface of host cells.

Product Information

NavID	Monoclonal Antibody to LPS
Category	Monoclonal Antibody to LPS
Host	Mouse
Clonality	Monoclonal
Clone Number	C9
Immunogen	Small Molecule
Form	Supplied as solution form in 0.01M PBS, 1% BSA pH7.4, containing 0.05% Proclin-300, 50% glycerol
Application	WB, IHC, ICC, IF
Storage	4°C
Concentration	0.93 mg/mL
Purify	Protein A/G affinity chromatography
Notes	Small volumes of anti-LPS antibody vial(s) may occasionally become entrapped in the seal of the product vial during shipment and storage. If necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the container's cap.
